

Cytec UK Pension Plan

Statement of Investment Principles – December 2021 (replaces September 2020)

1. Introduction

ndapt Ltd (“the Trustee”) has drawn up this Statement of Investment Principles (“the Statement”) of the Cytec UK Pension Plan (“the Plan”). The Statement has been drafted to comply with the requirements of the Pensions Act 1995 (“the Act”), the Occupational Pension Schemes (Investment) Regulations 2005, subsequent legislation and associated requirements. The Statement is intended to affirm the investment principles that govern decisions about the Plan’s investments. This Statement replaces the previous version, dated September 2020.

In preparing this Statement the Trustee has consulted Cytec UK Holdings Limited, the Plan’s Principal Employer (“the Company”). The Trustee has also consulted with Solvay SA as the Plan’s ultimate parent company. The Trustee has also obtained and considered written professional advice from Mercer Limited, (“the Investment Consultant”) and believes that the Investment Consultant meets the requirements of Section 35(5) of the Pensions Act 1995 (as amended)

2. Process For Choosing Investments

The Trustee has considered its objectives for investing the Plan assets. Investment and Funding objectives are considered together and in light of the Company covenant to ensure that the two are compatible and supportable. The Trustee makes all major strategic decisions including, but not limited to, the Plan’s asset allocation and the appointment and termination of investment manager(s).

The process for choosing investments is as follows:

- identify appropriate investment objectives;
- agree the level of risk consistent with meeting the objectives set; and
- implement an investment strategy and investment manager structure in line with the level of risk and objectives agreed (taking into account limitations on the overall complexity of arrangements appropriate to the size of assets under management).

The Trustee takes into account what it believes to be financially material considerations over an appropriate time horizon, which can include risk and return expectations as well as Environmental, Social and Governance (“ESG”) issues where these are considered to have a material impact on income, value or volatility of an investment held or the overall portfolio of investments held by the Plan. Specific considerations are detailed throughout this Statement.

In considering the appropriate investments for the Plan, the Trustee has obtained and considered the written advice of Mercer Limited, whom the Trustee believes to be suitably qualified to provide such advice. The advice received and arrangements implemented are, in the Trustee’s opinion, consistent with the requirements of Section 36 of the Pensions Act 1995 (as amended).

3. **Investment Objectives**

The objectives set out here, and the risks and other factors referenced are those that the Trustee determines to be financially material considerations in relation to the Plan.

The Trustee's primary objectives are to invest the Plan's assets in the best interests of the members and beneficiaries and pay due regard to the interest of the Company on the size and incidence of contribution payments, and in the case of a potential conflict of interest in the sole interest of the members and beneficiaries. Within this framework the Trustee has agreed a number of secondary objectives to help guide it in its strategic management of the assets and control of the various risks to which the Plan is exposed.

The secondary objectives are as follows:

- to maintain the Plan's funding position on an ongoing (i.e. Technical Provisions) basis and to achieve over the long-term, a return on the Plan's assets which is consistent with the assumptions made by the Scheme Actuary in determining the funding of the Plan; and
- to meet its obligation to the beneficiaries of the Plan, including ensuring that sufficient liquid assets are available to meet benefit payments as they fall due.

Given the nature of the liabilities, the investment time horizon of the Plan is potentially long-term (i.e. several decades). However, any future opportunities to transfer liabilities (fully or partially) to an insurance company (e.g. through the purchase of bulk annuities with an insurance company) may shorten the Plan's investment horizon significantly.

The Trustee understands, following discussions with the Company, that the Company is willing to accept some degree of volatility in its contribution requirements in order to reduce the long-term cost of the Plan's benefits.

4. **Risk Management and Measurement**

- There are various risks to which any pension plan is exposed which the Trustee believes may be financially material to the Plan. The Trustee recognises that whilst increasing risk increases potential returns over a long period, it also increases the risk of a shortfall in returns relative to that required to cover the Plan's liabilities as well as producing more short-term volatility in the Plan's funding position. The Trustee has taken advice on the matter and (in light of the objectives noted previously) considered the implications of adopting different levels of risk.

The Trustee's policy on risk management and measurement is as follows:

- The primary investment risk faced by the Plan arises as a result of a mismatch between the Plan's assets and its liabilities. This is therefore the Trustee's principal focus in setting investment strategy, taking into account the nature and duration of the Plan's liabilities.

Key strategic investment risks that impact on Plan funding are as follows:

- Equity Market Risk – the risk that asset valuations fluctuate in an uncorrelated way with the value of the liabilities;

- Interest Rate Risk – the risk that changes in the value of the assets do not move in line with changes in the value placed on the Plan’s liabilities in response to changes in interest rates;
- Inflation Risk – similar to interest rate risk but concerning inflation;
- Credit Risk – the risk that one party to a financial instrument will cause a financial loss to the Plan by failing to discharge an obligation.
- Currency Risk – the risk that foreign currency exposure causes asset valuations to fluctuate in an uncorrelated way with the value of the liabilities which are denominated in Sterling.
- Liquidity Risk – the risk that the Plan doesn’t have sufficient liquid assets to meet payments.

Considerations specific to Environmental, Social and Governance issues are addressed in Section 11.

To manage investment risks the Trustee has established an investment policy designed to reduce risk, without damaging the Plan’s long term return prospects, using asset-liability modelling conducted by Mercer which measures the contribution of different risk factors to overall Value at Risk (“VaR”).

In particular:

- Equity market risk is managed via the strategic allocation and by holding a diversified portfolio of companies globally by stock, sector and market region. Overseas currency risk resulting from equity investment may be partially hedged back into Sterling.
- The Trustee has also developed a Liability Driven Investment (“LDI”) framework which seeks to reduce the mismatch between the sensitivity of the assets and the liabilities to changes in interest rates and inflation. The LDI portfolio targets hedge ratios of 100% as a proportion of Technical Provisions liabilities for both interest rates and inflation, based on point in time modelling analysis that is refreshed periodically. The Trustee recognises that the target LDI portfolio will not produce a perfect match for the liability exposures it is aiming to hedge. Furthermore, the Trustee recognises that there are different measures for calculating the liabilities that may not be closely matched by the LDI assets held.
- The Plan’s LDI portfolio is invested on a pooled fund basis. However, the underlying investments include derivative exposures that introduce other specific risks that are additional to the risks presented from investing in the equivalent physical asset. These include:
 - basis risk (the risk that the derivative invested in does not perfectly match the physical asset that the derivative has replaced);
 - roll risk (the risk that the terms available when the derivative is taken out are not available when the contract expires and is replaced);
 - recapitalisation risk (the risk that adverse price movements require payment of capital in order to maintain the position);

- collateral and counterparty risk (the risk that the party with whom the LDI manager has contracted defaults and that any collateral is insufficient to make good any resulting loss);

These risks are mitigated through the specific arrangements that are implemented so that the likelihood of the risks is low and/or the impact of them is low.

- Credit risk is managed via the strategic allocation and investing in pooled fund(s) with diversified holdings of bonds that are predominantly of investment grade quality.
- Currency risk is managed through the total allocation to overseas markets and consideration of currency hedging.
- Regarding liquidity risk, the Trustee believes that the majority of the Plan's investments are realisable at short notice in most prevailing market conditions.

The Trustee recognises the following additional risks and takes the following steps to manage risk:

- Risks that may arise from the lack of diversification of investments. Subject to managing the risk from a mismatch of assets and liabilities, the Trustee aims to ensure the asset allocation policy in place results in an adequately diversified portfolio.
- The documents governing the investment manager(s) appointment include a number of guidelines which, among other things, are designed to ensure that only suitable investments are held by the Plan. The manager(s) are prevented from investing in asset classes out with their mandate without the Trustee's prior consent.
- Arrangements are in place to monitor the Plan's investments to help the Trustee check that nothing has occurred that would bring into question the continuing suitability of the current investments. To facilitate this, the Trustee meets periodically with the Plan's investment manager(s) and receives regular reports from the investment manager(s) and investment consultant.
- The safe custody of the Plan's assets is delegated to professional custodians (either directly or via the use of pooled vehicles).
- Across all of the Plan's investments, the Trustee is aware of the potential for regulatory and political risks. Regulatory risk arises from investing in a market environment where the regulatory regime may change. This may be compounded by political risk in those environments subject to unstable regimes.

Overall, the Trustee primarily measures and manages investment risk through the investment strategy (outlined in Section 6) and reviews the appropriateness of this strategy on a regular basis.

The Trustee's willingness to take investment risk is dependent on the continuing financial strength of the Company and its willingness to contribute appropriately to the Plan. The financial strength of the Company and its perceived commitment to the Plan is monitored and the Trustee would expect to reduce investment risk relative to the liabilities should either of these significantly deteriorate.

The degree of investment risk that the Trustee is willing to take also depends on other circumstances, including the financial health of the Plan, the Plan's liability profile and investment time horizon. The Trustee will monitor these with a view to altering the investment objectives, risk tolerance and/or return target and asset mix, should there be a significant change in these factors.

5. Portfolio Construction

The Trustee has adopted the following principles on portfolio construction:

- There is a role for both **active and passive management**. Passive management involves employing investment managers to deliver a return equal to a chosen benchmark appropriate to the asset class held. Active management involves employing investment managers who aim to outperform a benchmark but with a risk that they will underperform. By employing both, the Trustee aims to take advantage of active management where it believes it is likely to lead to outperformance net of fees, while using passive management in other areas or alongside active management to control overall manager risk and to manage overall fee levels.
- Decisions on **segregated vs pooled investments** will be taken based on the particular circumstances, including the available vehicle, investment restrictions contained in pooled funds, the need for and availability of an independent custodian, ease of administration and portability of underlying investments. Investment exposure is currently obtained via pooled funds.
- At the total Plan level investments should be broadly **diversified** to ensure there is not a concentration of exposure to any one issuer, to the extent that this is not protected (e.g. by collateral). This restriction does not apply to investment in UK Government debt. Appropriate diversification between markets will also be ensured.
- The amount invested in **highly concentrated portfolios** will take into account the level of risk this represents taking into account the Plan's assets overall.
- The Trustee recognises that there is **liquidity risk** in holding assets that are not readily marketable and realisable. Given the long-term investment horizon of the Plan, the Trustee believes that a degree of liquidity risk is acceptable because it expects to be rewarded for assuming it. The amount invested in any illiquid investments, such as property or pooled property funds, will take into account the implications of not being able to readily liquidate a proportion of the Plan's investment on the operation of the Plan.
- Investment in **derivatives** is permitted directly or within pooled funds for risk reduction purposes or to facilitate efficient portfolio management (including the reduction of cost or the generation of additional capital or income with an acceptable level of risk).
- Investment may be made in securities that are **not traded on regulated markets**. Recognising the risks (in particular liquidity and counterparty exposure), such investments will normally only be made with the purpose of reducing risk or to facilitate efficient portfolio management. In any event the Trustee will ensure that the assets of the Plan are predominantly invested on regulated markets.

- The Trustee will not invest directly in the **Plan sponsor or associated companies**, but acknowledges that indirect investment is possible as a result of the investment policies of the Plan's pooled investment manager(s). The Trustee will invest in such a way that indirect exposure will not exceed 5% of total assets.
- **Direct borrowing** (such as the use of an overdraft facility) is not permitted except to cover short term liquidity requirements. The use of **borrowing within pooled funds** is reviewed by the Trustee as part of the onboarding process for new investments.

6. Investment Strategy

The Trustee has agreed, based on expert advice, an investment strategy that is consistent with its funding and investment objectives. The split of assets within each asset class (excluding any cash held separately to meet day to day cash flow requirements) will be as outlined in the table below. The Trustee believes that the investment risk arising from the investment strategy is consistent with the policy outlined in Section 4.

Fund	Target Allocation (%)
Growth Assets	35.0
Diversified Growth	35.0
Matching Assets	65.0
Corporate Bonds	32.5
Liability Driven Investment	32.5
Total	100.0

*LDI may include physical gilt and index-linked gilt holdings, as well as partially funded exposure to changes in interest rates and inflation through pooled vehicles with underlying exposure to derivative contracts including interest rate and inflation swaps, total return swaps and gilt repo. It may also include cash.

More detailed information on the Plan's investment arrangements, including manager benchmarks and control ranges is set out in the Statement of Investment Arrangements ("SIA") document.

7. Day-to-Day Management of the Assets

The Trustee delegates the day-to-day management of the investment arrangements, including selection, retention and realisation, to investment manager(s) in accordance with Section 5 and as detailed in the SIA document. The Trustee has taken steps to satisfy itself that the Plan's investment manager(s) have the appropriate knowledge and experience for managing the Plan's investments and are carrying out their work competently.

The Trustee has determined, based on expert advice, a benchmark mix of asset types and ranges within which each appointed investment manager may operate.

The Trustee periodically reviews the continuing suitability of the Plan's investments, including the appointed manager(s) and the balance between active and passive management, which may be adjusted from time to time. It does so via regular reports and periodic presentations from the appointed manager(s) with the assistance of the Plan's appointed investment advisor. However, any such

adjustments would be done with the aim of ensuring consistency with this Statement.

Section 13 sets out how the Trustee incentivises investment managers, where applicable, to operate in line with the Trustee's objectives.

8. **Expected Return**

The Trustee expects to generate a return, over the long term, at least in line with that of the actuarial assumptions under which the Plan's funding has been agreed. It is recognised that over the short term performance may deviate significantly from the long term target.

9. **Additional Assets**

Members of the Plan may participate in AVC arrangements, which are invested and used to increase pension benefits at retirement, or in the event of death. The Trustee establishes the arrangements under which these contributions are invested, details of which are contained in the SIA document.

10. **Selection, Retention and Realisation of Investments**

The selection, retention and realisation of assets is carried out in a way consistent with maintaining the Plan's overall strategic allocation and consistent with the overall principles set out in this Statement.

The Trustee has implemented a policy to manage the Plan's net cash in/out flow and details are contained in the SIA document. Within individual mandates, the investment manager(s) have discretion in the timing of realisation of investments and in considerations relating to the liquidity of those investments subject to the relevant appointment documentation and pooled fund prospectuses.

In addition, the Trustee monitors the allocation between the appointed manager(s) and between asset classes and mandates and will rebalance (or delegate this to individual investment manager(s)) as set out in the SIA document.

11. **ESG, Stewardship and Climate Change**

The Trustee believes that financially material factors, including environmental, social, and corporate governance (ESG) factors, may have a material impact on investment risk and return outcomes, and that good stewardship can create and preserve value for companies and markets as a whole. The Trustee also recognises that long-term sustainability issues, particularly climate change, present risks and opportunities that may apply over the Plan's investment time horizon and increasingly may require explicit consideration.

The strategic benchmark has been determined using appropriate economic and financial assumptions from which expected risk/return profiles for different asset classes have been derived. These assumptions apply at a broad market level and are considered to implicitly reflect all financially material factors.

The Plan's assets are invested in pooled vehicles and the day-to-day management of the Plan's assets has been delegated to investment manager(s), including the selection, retention and realisation of investments within their mandates. In doing so these investment manager(s) are expected and encouraged to undertake

engagement activities on relevant matters including ESG factors (including climate change considerations) and to exercise voting rights and stewardship obligations attached to the investments, in accordance with their own corporate governance policies and current best practice, including the UK Corporate Governance Code and UK Stewardship Code. The Trustee engages with existing investment manager(s) on these issues through (amongst other things) meetings and periodic correspondence. Managers who are FCA registered are expected to report on their adherence to the UK Stewardship Code on an annual basis. This applies to both equity and debt instruments, as appropriate, and covers a range of matters, including the issuers' performance, strategy, capital structure, management of actual or potential conflicts of interest, risks, social and environmental impact and corporate governance.

Notwithstanding the above, the Trustee recognises that in passive mandates the choice of benchmark dictates the assets held by the investment manager and that the manager has limited freedom to take account of factors that may be deemed to be financially material as part of stock selection decision-making. The Trustee accepts that the primary role of its passive manager(s) is to deliver returns in line with the market and believes this approach is in line with the basis on which the current strategy has been set.

The Trustee considers how ESG, climate change and stewardship is integrated within investment processes in appointing new investment managers, monitoring existing investment managers and retaining or withdrawing from investment managers. The relative importance of these factors compared to other factors will depend on the asset class being considered. Monitoring of the existing investment managers is undertaken on a regular basis and this makes use of the investment consultant's ESG ratings. This is documented at least annually and the Trustee is informed of any changes to ESG ratings usually on a quarterly basis. The Trustee will challenge managers who it believes are taking insufficient account of ESG considerations in implementing their mandates. The Trustee will also monitor investment manager engagement activity (such as voting) at least annually.

The Trustee has not set any investment restrictions on the appointed investment manager(s) in relation to particular products or activities, but may consider this in future.

The Trustee will not consider the ESG policies of Additional Voluntary Contributions provider(s) and associated investment funds as these are a small proportion of total assets.

12. **Non-Financial Matters**

"Non-financial matters" (where non-financial matters includes members' ethical views separate from financial considerations such as financially material ESG issues) are not explicitly taken into account in the selection, retention and realisation of investments. The Trustee would review this policy in response to significant member demand.

13. **Investment Manager Arrangements**

Alignment of Investment Manager Objectives and Incentivisation

Investment managers are appointed based on their perceived capabilities and, therefore, their perceived likelihood of achieving the expected return and risk characteristics for the asset class or specific investment strategy they are selected to manage over a suitably long time horizon. This includes, in relation to active management, appropriate levels of outperformance, and in relation to passive management suitable levels of “tracking error” against a relevant benchmark.

The Trustee seeks expert advice in relation to these appointments. This advice may consider factors such as the manager’s idea generation, portfolio construction, implementation, business management, timeliness and quality of reporting, as well as the investment manager’s approach to ESG and engagement activity, as they apply to the specific investment strategy being considered.

Where relevant, the Trustee specifies the investment objectives and guidelines in an Investment Management Arrangement (“IMA”) and sets these so that they are in line with the Trustee’s specific investment requirements. In relation to pooled investment vehicles, the Trustee accepts that it has no ability to specify the risk profile and return targets of the manager other than through the choice of specific vehicles. The Trustee will therefore select vehicles that best align with its own policy in terms of investment objectives and guidelines (as set out in relevant governing documents) and, once appointed, will review the appointment should there be any material changes in these terms.

The Trustee makes appointments with the view to them being long term (to the extent this is consistent with the Trustee’s overall investment time horizon) and there is typically no set duration for the manager appointments. However, appointments can typically be terminated at relatively short notice.

For each appointment, retention is dependent upon the Trustee having ongoing confidence that the investment manager will achieve the mandated investment objective. The Trustee makes this assessment taking into account various factors which includes performance to date as well as an assessment of future prospects.

Investment managers are therefore incentivised both to achieve the mandated objectives, consistent with the Trustee’s policies and objectives, and to ensure that they remain capable of doing so on a rolling basis. This encourages investment managers to take a suitably long term view when assessing the performance prospects of, and engaging with, the equity and debt issuers in which they invest or seek to invest.

Performance Assessment and Fees

The Trustee receives reporting on asset class and investment manager performance on a regular basis, via a combination of formal independent reports and presentations from investment managers.

Investment returns (and volatility) are measured both on an absolute basis and relative to one or more suitable benchmarks and targets.

As well as assessing investment returns, the Trustee will consider a range of other factors, with the assistance of the investment advisor, when assessing investment managers, which may include but is not limited to:

- Personnel and business change;
- Portfolio characteristics (including risk and compatibility with objectives) and turnover;

- Voting and engagement activity;
- Service standards;
- Operational controls; and
- The advisor's assessment of ongoing prospects.

Investment managers are remunerated by way of a fee calculated as a percentage of assets under management (in some cases subject to a minimum fee threshold). In each case, the principal incentive is for the investment manager to retain their appointment by achieving their objectives, in order to continue to receive their fee in full.

Portfolio Turnover Costs

Turnover costs arise from a) "ongoing" transactions within an investment manager's portfolio and b) "cashflow" costs incurred when investing in or realising assets from a mandate.

The Trustee has not historically monitored investment managers' ongoing transaction costs explicitly but has measured these implicitly through ongoing performance assessments which are net of these costs. The Trustee will now seek explicit reporting on ongoing costs for all appointed managers.

The Trustee does not monitor regular cashflow costs (but seeks to minimise them through ongoing cashflow policy). The Trustee monitors the costs of implementing strategic change via the investment consultant.

14. **Compliance with this Statement**

The Trustee will monitor compliance with this Statement annually. The Trustee will also periodically check that the investment manager(s) have given effect to the investment principles in this Statement and the SIA document so far as reasonably practicable and that in exercising any discretion the investment managers have done so in accordance with Section 4 of The Occupational Pension Schemes (Investment) Regulations 2005.

13. **Review of this Statement**

The Trustee will review this Statement at least once every three years and without delay after any significant change in investment policy. Any change to this Statement will only be made after having obtained and considered the written advice of someone who the Trustee reasonably believe to be qualified by their ability in and practical experience of financial matters and to have the appropriate knowledge and experience of the management of pension Plan investments. Any such review will be undertaken in consultation with the Company.
